

## GlobalsDB Challenge Code Submission:

1. You need a GitHub account
2. The URL for the Challenge is: <git@github.com:GlobalsDB/Challenges.git>
  - a. Note that the above uses ssh. SSH is the prescribed way to interact in a read/write way with the Challenges URL. Your github account should be setup to use SSH.
3. Setup the work directory (Command line instructions):
  - a. Clone the Challenge repo --> `git clone git@github.com:GlobalsDB/Challenges.git`
  - b. Change to working directory --> `cd Challenges/1`
  - c. Create a new folder with named with your github id --> `mkdir <YOUR_GITHUB_ID>`
  - d. Add files to this working directory
4. Submitted completed Challenge
  - a. Change to your working directory --> `cd Challenges/1/<YOUR_GITHUB_ID>`
  - b. Snapshot the files for the challenge--> `git add .`
  - c. Record the snapshot --> `git commit -m "My Globals Challenge submission"` (-m "comment for the submission" is optional)
  - d. Submit the snapshot --> `git push` (This uses the URL above for the git repository)
